

We are ready to start business cooperation with companies which have demand for steel structures

Polimex-Mostostal Steel Structures Division is the largest manufacturer and exporter of steel structures in Poland with manufacturing capacity of 7,000 tons per month. The amount of exported goods exceeds 90% of sales. Polimex-Mostostal delivers steel structures to customers from above forty countries around the world.

Steel structures is manufactured in the most modern production plant in Poland, equipped with the modern machinery park and latest technologies.

Polimex-Mostostal Steel Structures Division manufactures **steel structures** for the industries like power engineering, petrochemical, metallurgy, telecommunication, road construction as well as for the construction of halls, shopping centres, sports and public utilities. The offer comprises: large building structures, pressure tanks, silos, ducts, filters, ventilator housings, chimneys, towers (including pipe towers), bridges, viaducts, foot-bridges, trestle bridges, conveyor enclosures, cranes, ladders, handrails, elements of equipment as well as other, non-standard welded structures.

Polimex-Mostostal Steel Structures Division also specialises in the fabrication of containers and **pallets** that can be used for transportation of gas cylinders, glass, automotive components.

Polimex-Mostostal Steel Structures Division offers **welding of steel girders, the production of box sections, tooling metallurgical profiles and machining.**

Steel structures may be fabricated on the basis of either Customer's technical documentation or documentation developed by our own design engineers.
