

FACTORY

Our factory is located in Tarnow and have 25 MW capacity per year. Bruk-Bet Solar is in top three of the polish producers with high quality photovoltaic modules and BIPV.

Bruk-Bet Solar is equipped in semi automated line supported by addition machines improving product quality. Our new EL Tester and high pot place Bruk-Bet Solar in leading position in Poland. Modules produced by Bruk-Bet Solar has EU components - there is also possibility to produce modules with European solar cells as for PREMIUM PRODUCT. Relying on our 10 years experience In world wide PV industry we are tire one in Polish photovoltaic. Our experienced staff is facing new challenges and we present our product in possibilities to many world wide partners. We are open for multilevel cooperation with international customers on mature markets and starting's one, our team has long experience in OEM production on European market.

Prices are definitely related with the volume of your order. We can supply you modules EXW from our factory in Tarnów, Poland.

TECHNOLOGY

Bruk-Bet is focused on the production of mono, polycrystalline and BIPV modules. We use only highest quality materials coming from European suppliers, taking care of the smallest details of aesthetics, performance and security, guarantee full reliability module in 25 years of use.

Lamination process use in high-quality solar glass, EVA and backsheet film. Used glass has a high light transmittance and mechanical resistance. EVA and backsheet film are uses as insulating material, encapsulating from the weather. Testing the module is to check the rated module and define the value of the generated voltage and electric current. Experienced staff, the automated manufacturing process, high production standards and quality ensure accurate and timely execution of contracts

Poly/Mono modules/Transparent/Coloured modules for BIPV

Mono: BEM 250/255/260/265/270/310/320 Poly: BEP 235/240/245/250/255/300

-  25 year linear performance warranty
-  100 % electroluminescence inspection
-  Guaranteed positive power tolerance
-  Maximum 5400 Pa snow load
-  IP67 junction box available, long-term weather endurance
-  Innovative solution: anti-reflective coating for high sunlight absorption
-  Potential Induced Degradation FREE
-  High quality components
-  packing system to avoid micro cracks

CERTIFICATES

Salt water mist
resistance certificate

Ammonia
resistance certificate

Fire resistance certificate

WARRANTY

12 years product warranty
10 year 90% electric performance
25 years for 83% electric output

KEY FEATURES

- high modules efficiency through superior manufacturing technology.
 - high salt mist and ammonia resistance.
 - Bruk-Bet solar modules pass test of fire resistance.
 - antireflective coating for high sunlight absorption.
- According to higher expectation of our partners we decided to offer unique advantage and therefore we present product certified PID free.
