

Company Profile

Videomed Electronics Works was established in Poland in 1989. For more than 26 years it is one of most creative companies in the ENT field. Moreover we are the precursors to production of digital hearing aids and the only manufacturer of audiometers in Poland.

Videomed has more than dozen patents, especially in laryngology and otolaryngology fields. Thus we are able to create high quality devices based on the best standard solutions and the most advanced innovations. Each year we display the capability for designing hardware, software and know-how in manufacturing process that delivers equipment that is innovative, reliable and, at last but not least, easy to use.

In 2006 we obtained ISO 13485 and ISO 9001 certification issued by Tuev Nord. In addition, all of our products are marked with CE as well as Free Sale Certificate. For many years our company has been annual exhibitor at EUHA exhibition (EU Hearing Healthcare) in Germany and MEOTO exhibition in UAE, as well as in many other shows, exhibitions and conferences.

We offer high quality clinical and diagnostic audiometers, videotoscopes, light sources with cameras, endoscopes, lasers, suction units, ENT units and carts, medical furniture and a very wide range of ENT diagnostic equipment.

We sale our products not only locally but also globally. Videomed's equipment can be found not only in Poland but also in USA, ZEA, Portugal, Romania, Thailand and in many other countries. And with each month we extend the distributor range of our products. We deliver the highest quality, world class software backed up with service and technical support, for both Polish and world markets.

We are always looking for the latest solutions to ensure our offer is of ever increasing quality, for doctors and patients alike!
