

Dear Sirs,

LANDSBERG is the lider in cold-bent steel sections and profiles.

We are a leading manufacturer of steel profiles in Poland, including window reinforcement steel sections for all PVC window systems on the market: Aluplast, Aura, Brugmann, Decco, Deuceninck, Foris, Gealan, KBE, Kommerling, LB, Rehau, Salamander, Schucco, Trocal, Veka, Wintech, Wital, Wymar etc.

Apart from window reinforcements we can manufacture special profiles which can be applied in many industries such as: automotive, construction, installation etc.: (e.g. light steel constructions, fences, elevated floors, racks). We make them based on individual documentation of the ordering party or according to documentation prepared by our technical department. Special profiles provided by our company can be delivered 0.5 -10 m long, made of steel up to 4 mm thick in various types (to be individually agreed).

The profiles are produced of the highest quality steel from Polish and foreign mills according to company system procedures and the strictest European quality standards, including the ISO 9001.

The company's production facility located in northern Poland is equipped with one of the most modern machine tools in Poland for production. Customers highly rate the quality of our services because we offer a wast line of steel profiles tailored to the individual needs of companies and attractive prices.

It pays to trust us. JOIN US!

Sincerely yours,
Mike Motylewski
